Artwork at 25% of Final Size

Refer to colour swatchs for refference.

Custom colours, patterns and textures can be specially made with our printers for all full roof prints.

Please note the following points:

For actual print size, please zoom into this template at 600%. We print in CMYK colours, all Pantone (PMS) colours will be converted to CMYK.
PMS colour listings are the closest match to that colour. Some colour variation might occur from this design to the final printed product.
Due to the difference between printing inks, paint mixes and monitor displays, PMS matches are not exact in all cases. If an exact match is crucial, ask for a print sample first for approval.
For artwork that is provided in any format other than Vector (Ai or eps), pixelation may occur. In all cases, we request that logos and text are provided in vector format with fonts outlined.
Images should be at least 150dpi, we recommend 300 dpi where available.
